

ENGLEFIELD SHOWER WALLS AND TRAYS

Always check that the walls and tray are made from premium grade acrylic when you are looking around to purchase a new shower. Englefield Duracryl® 2mm sanitary grade acrylic is the best quality, so it will last, unlike some other less expensive grades.

ENGLEFIELD SHOWER WALLS

Englefield Shower walls are manufactured from Duracryl® 2mm sanitary grade acrylic, that is scratch and mould resistant. This means that they are of premium quality, ensuring that your shower looks almost as good in years to come as it does the day you bought it. Englefield's patented contour wall concepts gained recognition in the Design Awards, just one of many products that give credence to Englefield's innovative approach to every single detail and feature.

Please refer to Page 25 for approximate wall measurements. Wall sizes are designed to be fitted to Englefield Shower bases only.

FLAT WALL

- The Flat Wall is a sturdy 1-piece construction that is leak-proof.
- The Flat Wall option is available to fit the following standard Englefield shower enclosures: 3-sided and 2-sided options (1200 x 900mm, 1000 x 1000mm, 900 x 900mm, 900 x 750mm and 750 x 900mm), in either a height of 1830mm or 1935mm

ENGLEFIELD QUICK FIT® SHOWER TRAYS

Trays are the foundation of any shower and Quick-fit® trays are manufactured from one piece of resilient, premium quality, sanitary grade acrylic. Our trays also feature a smooth Safe-Grip slip resistant surface – another important detail to ensure your safety .

Quick-fit® shower trays have a solid base construction making them incredibly strong and reducing bending and warping. They are – 'quick to fit' as they have a 40mm upstand that requires no rebating into the wall frame when using 10mm plaster board. The upstand conceals the line of silicone so you have a waterproof join without the 'mouldy' line. This ultra high 40mm upstand also increases watertightness, so you can be assured of long lasting performance from this quality product.

TWO PROFILES

Quick-fit® shower trays now come in two profiles – standard and low profile. Quick-fit® trays have a standard 90mm sill height. Quick-fit® Low Profile trays have a 70mm sill height. Low profile trays have two waste positions – centre (all trays) and rear corner (selected trays only). These trays are currently available with the Milano and Studio ranges and selected Valencia showers. **Check the individual shower features / benefits and technical drawings in this catalogue, to ensure that you know which profile tray, and which waste options are available with each shower.**
